

PR Carbon & PR Carbon Pro Release Notes

Date:	2026.06.18
Device Version:	v01.03.02.16
Avinox Ride App Version:	v1.4.0.6173

What's Updated

- Added support for merging ride data to generate a continuous route.
- Added support for automatically switching to Boost mode when riding uphill to improve climbing performance.
- Added support for reversing the start and end points of a route before navigation.
- Optimized navigation performance with support for planning longer routes.

Notes:

- Do not power off the device and keep the Bluetooth of mobile phone enabled during the update. Avoid placing the phone too far from the bike.
- If the update fails, please try again.
